

IDOSOL WHITEPAPER

Initial dex offering or IDOs, are tokens that address any sort of resource facilitated on a decentralized trade (DEX) - an IDO is a point at which a venture dispatches a token through a decentralized liquidity trade. IDOs offer organizations tools for drawing in their networks in an economy that both advances their items and administrations while permitting them to settle on brilliant business choices with respect to their resources. Blockchain and the Crypto world means to tackle the reliance on unified stages and monetary models. All things considered, there are central parts as trades that are running in a completely controlled way. The arrangement as of late introduced itself in IDO – Initial DEX Offering.

IDOSOL is an advanced and innovative Initial DEX offering or IDO platform that is fully automated, decentralized, and scalable. IDOSOL is a Launchpad platform for Crypto projects that require crowd funding. We are supported and backed by the community, influencers, and marketing partners to help your project, get in front of the investors. The IDOSOL is deemed to be one of the most upfront and transparent IDO platforms of the Binance Smart Chain. The tier system is set up to allow everyday investors the chance to participate in IDO's. IDOSOL supports projects with the ability to distribute tokens and raise liquidity while providing free marketing and guaranteed investors.

Our Aim and Objectives

- IDOSOL is the bridge to this completely new world of fundraising across all smart-contract-based blockchains. IDOSOL is developing a cross-chain Launchpad and start-up incubator ecosystem based on blockchain technology. We offer complete IDO advancement services to help new companies, people, and organizations launch their tokens. Our blockchain specialists and expert, work related to make an intelligible guide to explore your IDO advancement venture which incorporates ideation and conceptualization, white paper creation, and token turn of events.
- We use Automated, Decentralized, Scalable multi-chain technology to build an IDO platform that differs from its competitors in terms of its uniqueness and the feature of legal institutional investors. An IDO refers to Initial Dex Offering which involves launching a coin or token via a decentralized liquidity exchange. IDO offers better liquidity at every level, enabling immediate access to liquidity and trading. This is the perfect solution for new projects to launch a token and access immediate funds. IDO enables the users to trade immediately. This ensures the

users/investors can buy their tokens quickly when launched and re-sell them at a much higher price later during the course of the IDO.

- Examining the business thoughts of business visionaries Nitty-gritty monetary and technical analysis led and data about the venture is recorded on well known Decentralized Trades (DEXes) and making of virtual tokens through which purchasers and vendors can buy resources after it is being recorded. Empowering crypto-to-crypto, crypto-to-fiat, and fiat-to-crypto exchanging administrations. This guarantees liquidity and there would be an ascent in the cost of virtual tokens and incorporating equipment and programming wallets for handling installments instantly. Givers can store crypto tokens, defend them with private keys and mystery passwords, and oversee their portfolios.
- Presenting cross-chain similarity for quick execution of the raising support campaigns. In this way, donors can move tokens from various blockchain networks by connecting their product and equipment wallets. This prompts benefits like more noteworthy exchanging volume, prizes to early financial backers, and conveyance of tokens pre-deal and post-deal. Leading Know Your Client (KYC) and Hostile to Illegal tax avoidance (AML) confirmation of financial backers. An endeavor that offers Introductory Dex offering improvement administrations will actually look at the foundation and information of pledge drives and dealers. Subsequently, this guarantees a protected encounter for clients and forestalls misrepresentation and tricks.
- Our deep research, design thinking-driven approach, and unmatched solutions in strategy consulting, technology, and operations create an innovative roadmap to help enterprises worldwide transit from conventional technology platforms to blockchain-driven systems. We are driven by the aim to identify and seize opportunities from disruption to deliver transformational outcomes for a new decentralized digital world.

BUSINESS BENEFITS

Index Token – We have noticed a demand for making investment decisions easy whilst maintaining profitability. Index portfolios cannot guarantee the discovery of the next best buy on the market but do help to diminish the probability of missing out on it by combining various projects under the same index portfolio. This also helps to optimize investor's fund instead of contributing to each individual project but to conclude investments in one or a few of the preferred areas: Technology Index token, Science and

healthcare Index token, Platform and launchpad Index token, Gaming and Metaverse Index token., Energy Index token.

Technical Testing & Stability - A security breach into a project's infrastructure could significantly reduce confidence in its token and irreparably harm its future value. That's why in addition to token creation and blockchain deployment we conduct security penetration testing, smart contract auditing, and assess blockchain stability. This adds a new level of confidence to a token from the company's and the investor's perspective, creating greater stability, reliability, and increasing capital gain capabilities. Our security token promoting organization doesn't offer "one size fits all" arrangements, rather every venture or retainer-based commitment is totally modified for your business to give you the best conceivable effect.

IDOSOL fills the fate of legitimate raising support through key counseling and groundbreaking security token improvement administrations. Your thought on the intelligently shaped is wisely formed into an ideal arrangement that works with market entrance and commitment with likely financial backers. Our central goal-driven methodology drawn from our solidarity in innovation regions prompts significant business results to sustain your development

Technical & Legal Stack - IDOSOL could transform society through upending industries, structures, and traditional business models. In this ecosystem, we believe that entrepreneurs with the drive, talent, and

ambition should be given every opportunity to succeed and grow their ventures. That's why our team works alongside companies at any stage of the token launching process to ensure they are optimally placed to succeed. Our hearty blockchain arrangements offer unique capacities to a scope of different organizations keeping watch for unrivaled versatility and innovative headway. Being at the focal point, all things considered.

Strategy & Consulting - The cornerstone of any high-quality project is a tailored market strategy and a strong business model. We assist our clients by delivering deep business insights, comprehensive market analysis, and exchange listing expertise. These factors combine to ensure that your project rises above the competition and is well-positioned to disrupt the marketplace.

Token Economics and Structure - Within most blockchain projects the choice of token and its use within the project ecosystem is a critical element of its success. We work closely with clients and recommend tokens based on their goals and the ecosystem's specific requirements. This includes experience with security tokens, utility tokens, and stable coins.

IDOSOL also provides venture capitalist advisors and partners, technical experts, angel investors, and experienced blockchain entrepreneurs. IDOSOL will use the network to grow our early-stage incubated start-ups - with the goal to turn them into global projects and allow IDO token holders to connect with those projects as part of our Launchpad.

Legal, Regulatory, and Tax - Token generation events can lead to complex regulatory requirements and unclear tax obligations, especially when investors come from a myriad of countries. To simplify this process and provide clarity and security, we partner with organizations that are specialized to provide this advice and structure a company's legal and tax requirements. This allows you to focus on what's important – growing your business and giving it the best possible opportunity to prosper.

IDOSOL Launchpad benefits for an investor

- Early opportunities for interaction and investment.
- Early visibility into venture teams and tech trends.
- New investment opportunities based on sound intellectual property rights are based on science and research.

- Exceptionally customer-centric teams, proven customer need, problem-solution fit, and customer commitment.
- Allows everyone to become an investor and the opportunity to raise and increase their existing capital on an equal footing.
- To make investment fair and equal to all, regardless
- Given the size of their investment, we have designed our platform model to offer both small and large capitalization investors the opportunity to invest themselves.

Moreover, before investing in any project, users can do their own research via the IDOSOL platform, where they can find all the key details of the project, such as:

- Project metrics
- The team behind it
- Tokenomics
- Overview and use-cases
- Roadmap, updates, and business development
- Updated development progress
- Activity and a community overview
- Community and social channels

WHY IDO IS A BETTER METHOD IN DISTRIBUTING TOKENS

- ❖ To battle the said difficulties, Starting DEX Offering was presented. IDO is a raising money strategy that empowers conventions for dealers. It is marginally like Initial Coin Offering (ICO), in any case, the key distinction being that IDO doesn't depend on any responsibility to a focal power. Dissimilar to peers like IEOs and ICOs, IDO is decentralized and offers ways for De-Fi conventions to improve out of the case, and foster adaptable and vigorous open money applications and stages. In view of the focal distinction between IDO and strategies, IDO is good to go to initiate an ever-evolving upset in the crypto and blockchain field!
- ❖ In the present predominant ICO model, centralization makes a great deal of issues. Outsiders can without much of a stretch control or square developments and progress. Being concentrated, the current model is powerless against programmers as well as a human blunder, loaning it defenseless against debasement or annihilation. These negatives proceed to affect the view of cryptographic money in general. Further, the discernible idea of ICO keeps society from publicly supporting and buying inside our innate right to bargain in private.
- ❖ The Initial DEX offering is totally founded on the decentralized organization and doesn't need more significant compensation expenses or different consents. Alongside it, even the little ventures and monstrous coordinated efforts can be productively done through the IDO since there is no requirement for you to trust that trade will support the crypto projects. In this manner, the nearby local area individuals can vet the crypto projects. Admittance to liquidity and exchanging is faster in this IDO gathering pledges model. It can likewise be worked with different wallets giving a consistent encounter to the clients.

TOKENOMICS AND TOKEN DISTRIBUTION

Within most blockchain projects the choice of token and its use within the project ecosystem is a critical element of its success. We work closely with clients and recommend tokens based on their goals and the ecosystem’s specific requirements. This includes experience with security tokens, utility tokens, and stable coins. IDOSOL cut across the clamor with our multi-channel promoting way to deal with staying in front of the opposition. Our reality upheld proposals and top to bottom comprehension of the cutthroat STO (Security Token Offering) industry assist you with utilizing the best open doors on the lookout. The best correspondences combined with the right promoting stages order financial backers' consideration and impact their insights and practices.

Using automated, Decentralized, Scalable multi-chain technology to build an IDO platform that differs from its competitors in terms of its uniqueness and the feature of legal institutional investors. An IDO refers to Initial Dex Offering which involves launching a coin or token via a decentralized liquidity exchange. IDO offers superior liquidity at every level, enabling immediate access to liquidity and trading. This is the perfect solution for new projects to launch a token and access immediate funds.

IDO enables the users to trade immediately. This ensures the users/investors can buy their tokens quickly when launched and re-sell them at a much higher price later during the course of the IDO. IDOSOL has set sail to embark on a journey towards new dawn by embedding the word “Trust” into the exchanges in the decentralized world of blockchain and introducing brand new transparent policies and

regulations leveraging Binance Smart Chain utilizing its tremendous transaction processing capabilities via the launch of their BEP-20 "IDO" token.
